

DEAR STUDENTS,

It has been a little over a year since June 24, 2022, when the Supreme Court's Dobbs v. Jackson Women's Health Organization decision overturned Roe v. Wade and wiped out the reproductive choice people in the United States had had for 49 years. Dobbs has upended reproductive healthcare in the United States. This film focuses on medical professionals and grassroots activists who began their work before Dobbs and have continued thereafter to fight to make abortion care available in all 50 states by whatever means necessary. Please watch the film, discuss it, learn from passionate changemakers what is possible when people advocate for their rights and their beliefs – and then spread the word in your community.

"**PLAN C** feels like essential viewing, not just because it's timely and diligent. It's a call to action that has the power to motivate and replace fear with hope."

SUNDANCE INSTITUTE

ABOUT THE FILM

A grassroots network fights to expand access to abortion pills across the United States keeping hope alive during a global pandemic and the fall of Roe v. Wade.

OUR GOALS FOR STUDENTS

- * To motivate action and increase awareness around options for abortion access nationwide
- * To support on-going movements and communities that are fighting to reduce stigma, share information, and ensure access to abortion care
- * To inspire students not to give up hope by showing them what is possible when people come together

OUR HOPE FOR YOUR SCHOOL

- Increase awareness on your campus;
- Give all students vital information regarding a safe abortion option;
- Activate the power of students nationwide;
- Moderate a conversation about abortion access and bodily autonomy with students, faculty, and the administration;
- Ensure that information regarding safe abortion is available at your school that it is accurate and has been updated post-Roe;
- Inspire participation in elections, including local elections, and support pro-choice legislation;
- Fight censorship by screening the film as a (still legal) way to share information about life-saving options!

YOUR CAMPUS SCREENING

First, see if you are able to work with your school librarian, faculty, or administration to host a screening in a large venue at your school through our partner, **GOOD DOCS**.

If that's not possible, we got you! We will make the film available to students and student organizations directly, *especially in restricted states and on conservative campuses* where student bodies may lack reproductive health resources and information may be censored. We are planning a special reproductive freedom event exclusively for students this fall, when we'll create a link available at no cost, no matter where you live – followed by a Zoom discussion with campuses around the country.

We know the film provides life-saving information and is a great way to bring folks together.

Campus screenings, even in a dorm room among a small group of friends, will generate meaningful discussion and direct action. We have created exclusive materials for students, beyond the full-length feature film, to support campus screenings and events including:

- * A 60-minute special version
- * A discussion guide
- * Links to recorded discussions
- * Links to additional scenes
- * Links to stickers, flyers, and downloadable posters
- * A social media tool kit
- * A Canva template for promoting your event online and with printed flyers

A person can't fight for their human rights if they don't know that they have them. They got to know that they have options beyond the deadly and dangerous ones.
